

# Get to Market Faster with the Experts in Qt Development

## Let's Build Something, Together.

Smart Resources for Your Qt® Development Lifecycle

**Blending art, engineering and technology, ICS works with your developers to build powerful applications to engage your audience.**

As the largest independent source of Qt expertise in North America, ICS provides integrated custom software development and UX design for touchscreen, embedded, mobile and desktop applications worldwide.

## Design

### Leading Products Lead with UX

Delivering your product is important. Delivering an application that works and people want to use is essential. It's also good business.

Leading with UX can help you build a leading product. Working with you, our UX designers develop an engaging experience while reducing time and costs and gaining a faster time to market. Many of our designers have engineering backgrounds and can resolve design integration challenges quickly. The real value of UX is evident when it is applied upfront to deliver what matters most – to the customer.

## Develop

### Qt Application Development Consulting

**Seasoned Qt engineers and project managers, who all have extensive experience on every level within a product lifecycle, lead our Qt software development teams.**

They know the tough issues that can arise during development and provide knowledge cultivated over many years of solving a wide range of Qt development challenges, to accelerate your project and bring insight, no matter the complexity.

## Deliver

### Great Products

**We provide expert consulting, training, custom software development and UX design services to help you deliver a better product.**

### Embedded and Mobile

Whether you are developing an application for touchscreen, embedded or mobile devices, ICS can provide a jump-start on your own efforts. It's how we apply our knowledge that makes the difference.

### High-Performance Desktop Applications

Desktop applications can be risky and expensive. ICS delivers exceptional power and technology performance to give any product a competitive advantage.

### One Engagement. Many Possibilities.

ICS supports Qt developers with a wide spectrum of services. Our team of Qt software engineers is process driven and is always developing new solutions to some of the toughest and most complex issues faced by product-driven companies worldwide. Bring your best ideas and toughest challenges and let's build something, together.

### Expert Training

ICS training keeps you on the leading edge of technology. We have put together intelligent lab-courses where our instructors present the subject matter in an understandable yet intensive format, taking the complex and making it simple.

# Great Products Start Here

## Some Recent ICS Engagements Across Many Industries

### Consumer & Industrial

Precor designs and builds the finest fitness equipment and has set the standard for continuous state-of-the-art fitness innovation. ICS helped develop Precor's next generation of Experience Series cardio equipment which features a Qt-enabled, high-end interactive touchscreen console.

### IVI Systems

Intel® has introduced a new product family of In-Vehicle Solutions which offer optimized hardware and software foundations for automakers and suppliers. To show the power and functionality of these highly integrated solutions, they collaborated with ICS to build an IVI system to showcase its core features, impressive graphics capabilities and ease of use.

### Aerospace & Defense

ICS played a critical role, with custom-written Qt interface objects, in the most comprehensive weapons modernization program in U.S. Army history. The program enables integrated battlefield engagements by everyone from unit commanders down to individual soldiers and out to adjacent units. Whether assessing overall unit readiness, directing over-the-horizon artillery or going door-to-door to clear insurgents, warfighters linked to modern sensors, systems, weapons and communications can make — and act upon — informed coordinated decisions in split-second time.

### Agriculture

A global manufacturer of industrial agricultural equipment decided to modernize their in-cabin operator experience with a state-of-the-art touchscreen command center. ICS trained dozens of employees in Qt, while developing a customized and highly efficient Qt Widget set that reflects the customer's brand. In addition, ICS developed the entire set of tractor apps delivering functionality such as throttle, transmission, SCVs, PTO and hitch but also the in-cabin infotainment experience complete with Bluetooth integration.

### Medical Systems

ICS provided Ivenix its deep test-driven software development experience and UI design capabilities to help deliver a safer, fully integrated, intelligent infusion pump management system. Ivenix is a leading innovative medical device company. This transformative infusion management system combines simplicity, state-of-the-art engineering, UI development and information technology within an adaptive, fluid delivery platform.

### Medical Devices

Mevion Medical Systems provide radiation therapy systems used to treat cancer. Its flagship product, the MEVION S250™ Proton Therapy System can deliver precise treatment, while lowering costs dramatically. Mevion brought ICS in to assist in completion of the software development and testing to ensure a timely filing for FDA clearance.

## How can we help you?

"ICS exceeded our expectations delivering a compelling user experience, delivering on time and on budget."

— **Patricia Morris**

*Director of Business Development  
Marketing and Communications  
for Intel In-Vehicle Solutions Group*

"The ICS engineers delivered the goods earning the respect of our developers with their **relentless focus on solving problems and getting things done.**"

— **Curt Kienast**

*Director of Software Engineering  
Mevion Medical Systems*
